

Control Techniques SP1402-1.5/1.1kw, Three Phase,380-480V AC, Unidrive SP Variable Speed Drive

Unidrive SP is a complete drive automation range that covers the power spectrum from 0.37kW to 1.9MW. All drives share the same flexible control interface regardless of the power rating. Drives are packaged in three formats: Panel Mount, Free-Standing and Modular. In 2018 SP become a legacy product. We can upgrade from SP to M600 or M701 as per the application.application.

| Specifications | Details |
|-----------------------------|--------------------|
| Max Continuous Current (A) | 2.8/2.1 |
| Enclosure | IP21 |
| Brand | Control Techniques |
| Supply Phase | 3 |
| Voltage | 380 - 480 Vac |
| Motor Shaft Power (kW) | 1.1 kW |
| Frequency (Hz) | 45 - 66 Hz |
| Motor Shaft Power (hp) | 1.5 hp |
| Output Frequency Range (Hz) | 0 - 550Hz |
| Dimensions (inch) | 14.9 x 3.9 x 8.6 |
| Dimensions (mm) | 368 x 100 x 219 |
| Weight lb (Kg) | 5(11) |
