

PRM 280 | Pipe inspection camera with 28mm spring-loaded camera head | 7" LCD (800x400) and IP 57 Protection | Probe length of 30m

The PRM 280 is a flexible and portable tool for all types of pipe inspections. It is a great partner for your upcoming examination because it is tough and resistant to extreme climatic conditions. With its highly flexible camera head and 30m long interchangeable insertion probes, the PRM280 can easily navigate two consecutive 90-degree turns. The insertion probe is safe to use in unleaded gasoline, diesel, brake/transmission fluid, and machine oil and can tolerate water depths of up to 10 metres. Along with a 512Hz locator, the PRM280 also supports a transmitter on the camera head, which greatly facilitates pinpointing the precise location of the camera head.
