

Elitech ILD-200 | Infrared Refrigerant HVAC Leak Detector | Sensitivity Up Ato 0.14oz/Yr | For Air Conditioner And Automotive Repair

Leak detector, UV light, charging cable, replacement filters, carrying case, and compatible with all major refrigerants (CFC, HFC, HCFC, PFC, and HFO) are all included in the Elitech ILD-200 with leak detector. The best sensor in the leak detection system is the infrared sensor, which has an undegradable sensitivity, a long service life of over ten years, and the ability to reduce false alarms. Moreover, the detector enhances user experience and shows detection data in a more varied and intuitive manner thanks to its unique ergonomic design, peak value record, and wide TFT LCD screen. You will be perfectly equipped to perform efficient, dependable leak detection with ILD-200.

Specifications	Details
Sensor Type	Infrared
Power	Built-in lithium battery 3.7V 3000mA
Storage Temperature	-20°C~ 60°C (-4°F~ 140°F)
Operating Temperature	-10°C~ 52°C (-4°F~ 140°F)
Alarm	Audible and Visual
Dimensions	95*45*190mm (3.75*1.76*7.50in.) 415g (14.6oz)
