

Norton Quantum F996 115x22mm QUANTUM FIBRE DISC P120

Quantum R996 Fibre Discs Quantum Fibre Discs feature stronger fibre for longer life and a new SG Ceramic grain blend for high stock removal and edge chamferring. The high performance resin bond formula gives high grain retention and the supersize treatment ensures a cooler cut meaning no burns on the workpiece. Designed for use in investment casting foundries (stainless steel and cobalt chromium). Ideal for use on very hard to grind metals, coating and welds including weld preparation, grinding and blending.
